

## IOTSU®

IOTSU® is a perfect solution for wireless, long-term monitoring. IOTSU® measures and transmits data about presence, movement, number of visitors and the opening and closing of doors or windows. The coverage is excellent and it has a battery life of several years. IOTSU® is easy to integrate into other systems and processes.

The measurement results are stored in the system. Results analysis is simple, as is printing reports for desired periods of time.

### PRODUCT DATA SHEET

#### IOTSU® Presence

Presence monitoring and motion detection. Used for example in monitoring the occupancy rate of meeting rooms.

#### IOTSU® Door Monitor

Indicates when a door or window is opened or closed. Used, for example, in burglary protection.

#### IOTSU® Visitor Counter

Installed in connection with the door, indicates the number of visitors and the direction of the movement.

#### IOTSU® Acceleration

Installed in an object to monitor its movement such as shaking, falling or position changes.

Optional enclosure for outdoor usage.  
Delivery time approx. 10 days.

### TECHNICAL SPECIFICATIONS

**DIMENSIONS (LxWxH):** 77 x 25 x 22 mm

**WEIGHT:** 40g with battery

**TRANSMISSION CYCLE:** adjustable, supports configurable SMS and email alarms.

**CONNECTIVITY:** Sigfox RC1

**BATTERY:** Size AA 3.6V, replaceable

**OPERATING CONDITIONS:** -5°C - +50°C

**MOUNTING:** Magnet, adhesive tape
