

IOTSU® LOCATION

IOTSU® Location is a wireless solution for asset tracking and locationing

IOTSU® Location solutions can be used for tracking valuable assets and transports and for remotely monitoring cold chains and maintenance needs of machines and vehicles. IOTSU® Atlas can be used for cold chain management and tracking of transports when a small size and light weight are important. IOTSU® GPS is a more accurate solution and it is used for tracking assets, monitoring critical transportations and cold chains, and optimizing machine and vehicle maintenance.

IOTSU® includes sensor units, IoT platform and user interface which together enable reliable, easy and cost-efficient data gathering for monitoring and analysis purposes. IOTSU® products and services are designed, assembled, tested and maintained in Finland.

IOTSU® LOCATION PRODUCTS:

IOTSU® GPS

Measures GPS location data combined with acceleration.

IOTSU® ATLAS

Measures temperature and location using the Sigfox Atlas geolocation service.

FOR TECHNICAL SPECIFICATIONS of each product, see separate product information document.

BENEFITS AND FEATURES

- EASY TO INTEGRATE INTO OTHER SYSTEMS AND PROCESSES
- EASY TO PLUG & PLAY AND MAINTENANCE-FREE
- LONG LIFE-TIME (SEVERAL YEARS BATTERY LIFE)
- EXCELLENT COVERAGE
- MEASUREMENT DATA EASILY AVAILABLE FOR ANALYSIS
- ADJUSTABLE REMOTE MONITORING OPTION WITH CONFIGURABLE SMS AND EMAIL ALERTS
