

IOTSU® Motion is a wireless solution for motion detecting applications

IOTSU® Motion applications can be used for monitoring room usage and occupation, counting visitors, opening and closing of doors or windows, and detecting movement including shaking, falling, and position changes, or for security use.

IOTSU® includes sensor units, IoT platform and user interface which together enable reliable, easy and cost-efficient data gathering for monitoring and analysis purposes. IOTSU® products and services are designed, assembled, tested and maintained in Finland.

IOTSU® MOTION PRODUCTS:

IOTSU® Door and Window

Detects opening and closing of doors, windows or any other similar applications.

IOTSU® Acceleration

Designed for monitoring movement, falling or position changes of an object. Available for indoor or outdoor usage.

IOTSU® Visitor Counter

Indicates the presence, number of visitors, and the direction of the movement.

IOTSU® Motion

A solution for long-time monitoring of human presence and activity. Available for indoor or outdoor usage.

FOR TECHNICAL SPECIFICATIONS of each product, see separate product information document.

BENEFITS AND FEATURES

- EASY TO INTEGRATE INTO OTHER SYSTEMS AND PROCESSES
- EASY TO PLUG & PLAY AND MAINTENANCE-FREE
- LONG LIFE-TIME (SEVERAL YEARS BATTERY LIFE)
- EXCELLENT COVERAGE
- MEASUREMENT DATA EASILY AVAILABLE FOR ANALYSIS
- ADJUSTABLE REMOTE MONITORING OPTION WITH CONFIGURABLE SMS AND EMAIL ALERTS
